

My feedback at CHECK-OUT

Instructions to guest:
Leave at front desk, or submit
with hotel's comment card.

Guest Name: _____

Organization: _____

Room number: _____ Dates of stay: _____

green hotel initiative

When I checked in, I requested environmentally-friendly services.

- Thank you for honoring my "green" requests.
- You did not honor all of my requests, as explained below:

Compared to other hotels I stay at, this hotel offers:

- More environmentally responsible service.
- About average environmentally responsible service.
- Less environmentally responsible service.

These practices would make me more loyal to your hotel:

- Use compact fluorescent light bulbs.
- Install low-flow showers, toilets and faucets.
- Use refillable shampoo and soap dispensers.
- Donate unused food to local food banks.
- Other suggestions:

See back of card for more about how green practices save money.

I prefer to stay at hotels that are environmentally responsible. With that in mind, please honor these requests:

Towels. Replace only the towels I leave on the floor.

Sheets. Change my sheets: not at all / every _____ days.

Toiletries. Replace the soap, shampoo, and amenities

only if empty.

Recycling. Recycle paper, plastic and other recyclables

I leave in my room.

Lights and AC. Leave the lights off and AC low.

Daily newspaper. Do not deliver a paper to my room.

More information. Tell me about your hotel's

environmental policies and practices.

Instructions to guest:
Fill out and give to front
desk when you check in.

**My requests at
CHECK-IN**

Green business is good business.

Change your bulbs... ten times less often. Compact fluorescent lights (CFLs) fit in regular light sockets, but burn much more efficiently.

✓ One CFL lasts as long as 10 incandescent bulbs.

✓ CFLs use 75% less electricity than a regular bulb.

✓ Lighting your hallways and other 24-hour areas with CFLs can save thousands of dollars a year on energy and labor costs.

Save money one gallon at a time. Well-designed low-flow sinks, toilets and showerheads perform as well as the old water-guzzlers.

✓ Using 40-cent faucet aerators, a hotel trimmed \$3,200 a year off its water bill.*

✓ Another hotel decreased shower flow by one gallon a minute, and dropped its water bill by 10%.*

* These figures are from hotels with just over 200 rooms.

Find more savings ideas and resources to help you make these changes listed on the CERES Green Hotel Initiative Web site, at http://www.ceres.org/our_work/ghi.htm
